Why we started the company...

## Skin is porous .

**What you put on your skin is absorbed within minutes.**

Think of it.

Why do topical medications work?

They work for this very reason:

Skin can and does absorb whatever is placed on it.

What you put on your skin is important.

Skin care is part of good health and well being. It is not just about "beauty" or "looks" as the cosmetic industry would lead you to believe.

Good health of the skin can be seen by an improved appearance.

This is by result and not cover up.

If you are concerned as to what foods you eat and what goes into your body, take a moment to review the ingredients used in our creams, oils, salves and glycerin soaps.

See the strength of our products!

*DaCuore Natural Products*

Natural Beeswax    Ground Almonds  
Ground Sesame Seeds

## What's in it?

### Compare what you are using now:

Look at the label of the product you are using. .

Read the ingredient list.

(Sorry, that may mean getting out a magnifying glass.)

How many items listed are something from nature? Is there a long list of ingredients that are unrecognizable? If so, these questions arise:

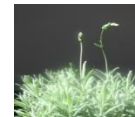

What are these unfamiliar ingredients?

Where do they come from?

Are they good for the body? .

Look at the same type of product in the DaCuore line of Natural Products. You will immediately see the difference. There are many ingredients from sources in nature you can recognize. The benefits of these ingredients enhance the product. Our creams are 99% natural and have less than 1% approved preservatives originating from plant sources. Our oils, salves and grains are 100% Natural.

Try our products and FEEL the difference.

Lavender Essential Oil

Organic Jojoba Oil

Sunflower Oil
